

Algebra II

Number and Quantity

B Use complex numbers. A2.NQ.B

- 7 Know and apply the Fundamental Theorem of Algebra. A2.NQ.B.7
-

Seeing Structure in Expressions

A Define and use logarithms. A2.SSE.A

- 4 Understand why logarithmic scales are used, and use them to solve problems. A2.SSE.A.4
-

Reasoning with Equations and Inequalities

A Solve equations and inequalities. A2.REI.A

- 1 Create and solve equations and inequalities, including those that involve absolute value. A2.REI.A.1
-

B Solve general systems of equations and inequalities. A2.REI.B

- 3 Create and solve systems of equations that may include non-linear equations and inequalities. A2.REI.B.3
-

Arithmetic with Polynomials and Rationals

A Perform operations on polynomials and rational expressions. A2.APR.A

- 2 Understand the Remainder Theorem and use it to solve problems. A2.APR.A.2
-

Interpreting Functions

A Use and interpret functions. A2.IF.A

- 1 Identify and interpret key characteristics of functions represented graphically, with tables and with algebraic symbolism to solve problems. A2.IF.A.1
-

Building Functions

A Create new functions from existing functions. A2.BF.A

- 1 Create new functions by applying the four arithmetic operations and composition of functions (modifying the domain and range as necessary). A2.BF.A.1
 - 3 Describe the effects of transformations algebraically and graphically, creating vertical and horizontal translations, vertical and horizontal reflections and dilations (expansions/compressions) for linear, quadratic, cubic, square and cube root, absolute value, exponential and logarithmic functions. A2.BF.A.3
-

Function Modeling

A Use functions to model real-world problems. A2.FM.A

- 1 Create functions and use them to solve applications of quadratic and exponential function model problems. A2.FM.A.1
-

Data and Statistics

A Make inferences and justify conclusions. A2.DS.A

- 2 Determine whether a specified model is consistent with a given data set. A2.DS.A.2
 - 4 Use data from a sample to estimate characteristics of the population and recognize the meaning of the margin of error in these estimates. A2.DS.A.4
-

B Fit a data set to a normal distribution. A2.DS.B

- 8 Know and use the characteristics of normally distributed data sets; predict what percentage of the data will be above or below a given value that is a multiple of standard deviations above or below the mean. A2.DS.B.8
